P-5035i MFP / P-6035i MFP

If it were any more productive, it would have to be paid a salary!

Everyone talks about high productivity and efficiency – the P-5035i MFP and P-6035i MFP embody them: scanning, printing and copying at a rate of 50 and 60 A4 pages per minute. After a warm-up time lasting no more than 25 seconds, the systems are ready to go, with the first print-out being started after just 8 seconds. A paper capacity of up to 2,600 sheets also ensures that things run smoothly even in the case of high-volume printing.

But the ability to work in a team is also very important. That is why we have equipped the multifunctional system with a HyPAS interface, which enables not only the integration of optional customer-specific software solutions, but also the use of HyPAS applications. As a result, the P-5035i MFP or P-6035i MFP can adapt to your requirements at any time. You will not find a better colleague anywhere!

Your benefits:

Productive: the 75-sheet automatic document feeder scans up to 60 black-and-white and 40 colour pages per minute and processes single and double-sided originals in A6R format (prescriptions/cheques) automatically. Printing and copying is carried out at 50 and 60 A4 pages in simplex mode and 36 and 43 A4 pages in duplex mode.

Flexible: a paper capacity of up to 2,600 pages from a maximum of six paper sources, which can contain paper weights of up to 220 g/m², formats from A6R to A4 and a wide range of media ensure smooth processes and short waiting times. Even envelopes can be processed directly from the optional paper tray.

Expandable: the integrated HyPAS interface enables the use of HyPAS applications. But even customer-specific software solutions can be integrated into the system by means of HyPAS - so that there is nothing standing in the way of effective document management.

Mobile: with the free Mobile Print app for Android and Apple iOS, the system can be selected via the optional WLAN from any compatible smartphone or tablet. Since the Apple AirPrint protocol is also supported, printing can also be carried out – without the installation of drivers – directly from an iPhone/iPad.

Peace and quiet: whether you are scanning, printing, copying or faxing – the integrated Quiet Mode can be activated at any time. The press of a button is enough to lower the speed of the system and thereby reduce the background noise to a minimum.
